VINIFICATION

Grapes are harvested at the peak of their maturity. After soft de-stemming, fermentation took place in stainless steel tanks at a controlled temperature of 25-28°C. When the juice reaches optimum balance of sugar and acidity, fermentation is stopped by cooling, in order to retain the natural sweetness and freshness of the wine.

The symbols on the Telavuri labels are inspired by artifacts of cultural heritage discovered during archaeological excavations around Georgia. These items are a glimpse into the lives of our ancestors, who have been cultivating vines and crafting wines in Georgia for 8000 years, making the region the birthplace of winemaking.

TASTING NOTES

Dark ruby colored wine has a black and red fruit flavor profile, accompanied by a sweet and long aftertaste.

Food Pairing: Serve with local spicy dishes, as well as with fruit salads and cakes at a temperature of 14-16°C.
